

I OPPOSE
SWEPCO's 345 kV
transmission line
project in its entirety.
NO ROUTE through
the Ozarks is an
acceptable route.

SWEPCO, STOP!

Don't clear-cut and bulldoze a swath as wide as an 8-lane freeway across 50 miles of the Ozark Highlands. Don't leave the Ozarks perpetually scarred by your power line freeway with its hundreds of towers twice as tall as the tallest Ozark trees.

SWEPCO, STOP!

The Ozarks are a National Treasure - "one of the oldest continually exposed landscapes on earth." Don't undermine the tourism economy that depends on this lovely and fragile karst landscape. Don't destroy this habitat of the 160 plants and animals that occur nowhere else in the world and that have had over 200 million years to adapt to this spectacular, rugged landscape.
